

**Skumatics** *goDash* is the data mining tool that---among other things---optimizes par levels and provides rapid access to all different prices being paid within the entire system for identical SKUs regardless of the source of the product. It also sorts products by UNSPSC to promote consolidation of utilization within a category. Your data is presented in our proprietary dashboard that includes savings opportunities through inventory reduction and spend management.

### Product Features

#### Content Analytics for purchasing managers

- Duplicate Items
- Duplicate Vendors
- New Item Alert
- Non-file Items
- UNSPSC Classification

#### Spend Analytics for contract managers

- Contract Variance
- Off-contract purchases
